

How To

Bead on Canvas

You may use a beading or regular sewing thread and needle. Thread your needle and double the thread, knotting it at the ends.

Bring your needle up at "A" and go through the bead, coming down at "B".

Come up again at "A".

Split your threads so that a single thread is on each side of the bead. Go down at "B" again. As the thread comes down, it hugs the bead, causing it to stand straight.
