

How to make a...

Bring your needle up to the front of the canvas. Wrap your thread around the needle keeping the thread taut.

Point your needle back into the canvas. I like to go back into the same hole. Slide the knot down the needle towards the canvas.

Pull your needle from the backside of the canvas. Pull the entire thread through until the knot is sitting on top of your canvas.

As you pull the needle to the back of the canvas make sure not to pull too hard. You don't want your knot to pop through the canvas hole to the backside of the canvas.
